Q-FAIR Data

Data availability

Cefas Data Portal <https://data.cefas.co.uk>

- 2162 Metadata records describing 6411 datasets
- Environmental data since 1880 increasingly available
- 136 Higher quality datasets with [Digital Identifiers DOI](#) including time series
- Data accessible via download, API and Web Map Services
- Automatic links to other data portals including MEDIN Portal
- Metadata compliant with MEDIN Discovery Metadata Standard

Search & Discover

Explore & Download

Connect & Reuse

Integrate and Federate

Multidisciplinary data including:

Biology

Oceanography

Environmental

Offshore Infrastructure

Boundaries and Zones

Aquaculture

Base Maps

Economics

Collaboration

with Partners, external data portals, national and international initiatives including:

Findability

Data increasingly discoverable

- Metadata online in searchable resource - Cefas Data Portal
- Data assigned a persistent identifier
- Discovery metadata following MEDIN Discovery Standard
- Data sets, assets, products and services increasingly open by default
- Increasingly intuitive user interface
- Metadata flows to other Portals including MEDIN Portal

Quality

Before you do anything
Is the data
Fit for purpose?
Does it demonstrate
trustworthiness?
Are you thinking about
the data lifecycle beyond
data collection and first
use?

Accessibility

Human and machine access to metadata and data

- Direct accessibility via API
- Increasingly 'two clicks to data'
- Wider range of data formats
- Data open by default
- Data Sharing processes and agreements for restricted data
- Protocol for data retrieval follows recognised standards
- Opportunities for collaborators to access restricted data
- Metadata increasingly accessible, even if the data restricted

Reusability

Documentation supports interpretation and reuse

- Comprehensive metadata
- Data increasingly accurate and well described
- QC checks continue to be established
- Clear and accessible data usage license
- Documentation clarifies how, why and by whom data created and processed
- Data and metadata meet relevant domain standards

Interoperability

Data increasingly machine readable

- Data provided in commonly understood and open formats
- Metadata to relevant standards
- Controlled vocabularies, keywords, thesauri or ontologies used where possible and known
- Improvements to national databases and data flows internationally
